TO: All POLYGLASS Users

CC: POLYGLASS Sales & Technical Services

Date: April 25, 2014

Author: Steven C. Wadding RRC, RRO, CDT
National Technical Services Manager

RE: Polyglass and Xtraflex Branded Polyisocyanurate Thermal Insulations

Polyglass is a full line manufacturer of low-slope and steep-slope roofing products. As with other construction products manufacturer's, for various reasons, some products are manufactured by a primary manufacturing source as a private label material.

Polyglass has chosen to partner with Atlas Roofing as the primary materials manufacturer for its Polyisocyanurate insulation needs. Polyisocyanurate stock, board, tapered products and HD products are provided under the brands Polyglass as well as Xtraflex by Polyglass, which are obtained by private label from Atlas Roofing.

Polyglass and Atlas Roofing share a common belief for product quality and customer satisfaction. As part of this belief, strive to provide the highest quality and customer friendly thermal insulation products to our customers.

Special circumstances and questions should be addressed to POLYGLASS Technical Services Department.
